EXPERIENCE

Techpearl software Pvt ltd, Bangalore— *Software Engineer*

JUNE 2016 - JULY 2018

As a Software Engineer at Techpearl, you worked on Health On Tech (HOT), a web and mobile application built using the Electron framework and CKEditor. This platform helped medical students prepare for exams. Your role included developing CKEditor plugins, debugging, fixing client issues, implementing enhancements, and conducting testing.

Fork technologies, Bangalore — *Software Engineer*

AUGUST 2018 - OCTOBER 2018

At Fork Technologies, you worked as a Software Engineer on projects like IEEE App and Geo Location App using Ionic 3 and Angular 4. The IEEE App allowed members to attend meetups and browse organizational history, while the Geo Location App provided real-time location tracking. You were responsible for development, debugging, fixing client issues, enhancements, and testing.

Novigo Solutions Pvt ltd, Mangalore — *Senior Software Engineer*

JANUARY 2019 - JULY 2020

At Novigo Solutions, I worked on multiple banking and financial applications, including:

- ✓ CDCU (Citadel Credit Union) and MWCU (Meriwest Credit Union) – Internal banking web applications built using Angular 8, Salesforce, and Tessellate, handling mortgage and call center functionalities
- ✓ COM (Conns Organization Management) and MCS (Marketing Campaign System) – Angular-based platforms for managing marketing campaign data
- ✓ CAM (Customer Account Management) – A financial web application developed in Angular 5 to manage customer accounts

My role involved front-end development, debugging, implementation of enhancements, and unit testing.

Niveus solutions Pvt ltd, Mangalore — Associate L2
-Software Developer

JULY 2020 Till Date

At Niveus, I have worked on various high-impact projects across banking, insurance, government, and automotive sectors, including:

- ✓ ICICI Insta Platform & UCJ ICICI – Internal banking web applications built using React.js, Redux, and Node.js, handling banking processes for loan, mortgage, and call center management
- ✓ CHASE by HDFC ERGO – A full-stack React and Node.js platform for tracking end-to-end insurance processes
- ✓ Axis My India– A government web app for complaint lodging and scheme updates, built with React.js, Next.js, and Redux
- ✓ M&M M4U App – A hybrid mobile and web app for Mahindra & Mahindra, involving migration of legacy Ionic 1/3 apps to Ionic 6 and React Native

In my current role, I'm also working on Google Cloud functionalities and Firebase integrations, contributing to cloud-based solutions and modernization efforts.

PROJECTS

Project Name	M&M M4U App Sustenance & Support
Customer	Mahindra & Mahindra
Technologies	HTML, javascript, SCSS
Solution Environment	Ionic1, Ionic3, Ionic6, Firebase
